A compact, versatile and functional high production juicer, with a wide range of accesories that make it perfect for customization.

- Automatic juicer for citrus: Oranges, lemons, limes, mandarins, and grapefruit
- The machine uses a squeezing system that is unique in the world, cutting the fruit in half and squeezing it without the juice coming into contact with the peel, this means the juice does not pick up any of the oil or bitterness in the peel, so what you get is top quality, 100% pure, natural tasting juice.
- All our machines are constructed with a stainless steel body.
- Top-mounted rotating basket that is part of the automatic feed system. The basket holds up 20 lbs of fruit and when full makes the machine visually attractive.
- Digital Programmer and fruit counter for monitoring the number of fruits squeezed, plus a digital display screen that provides information on the machine's operating status.
- Drip tray and grille.
- Waste peel collection bins. 1.85 gal plastic bins
- Quick and easy to clean. It only takes 6/7 minutes to disassemble, clean, dry and reassemble the removable parts.
